Other species: 2.40 billion USD

Main markets of Fisheries product of VN

Source: VASEP 2016

Challenges for sustainable development

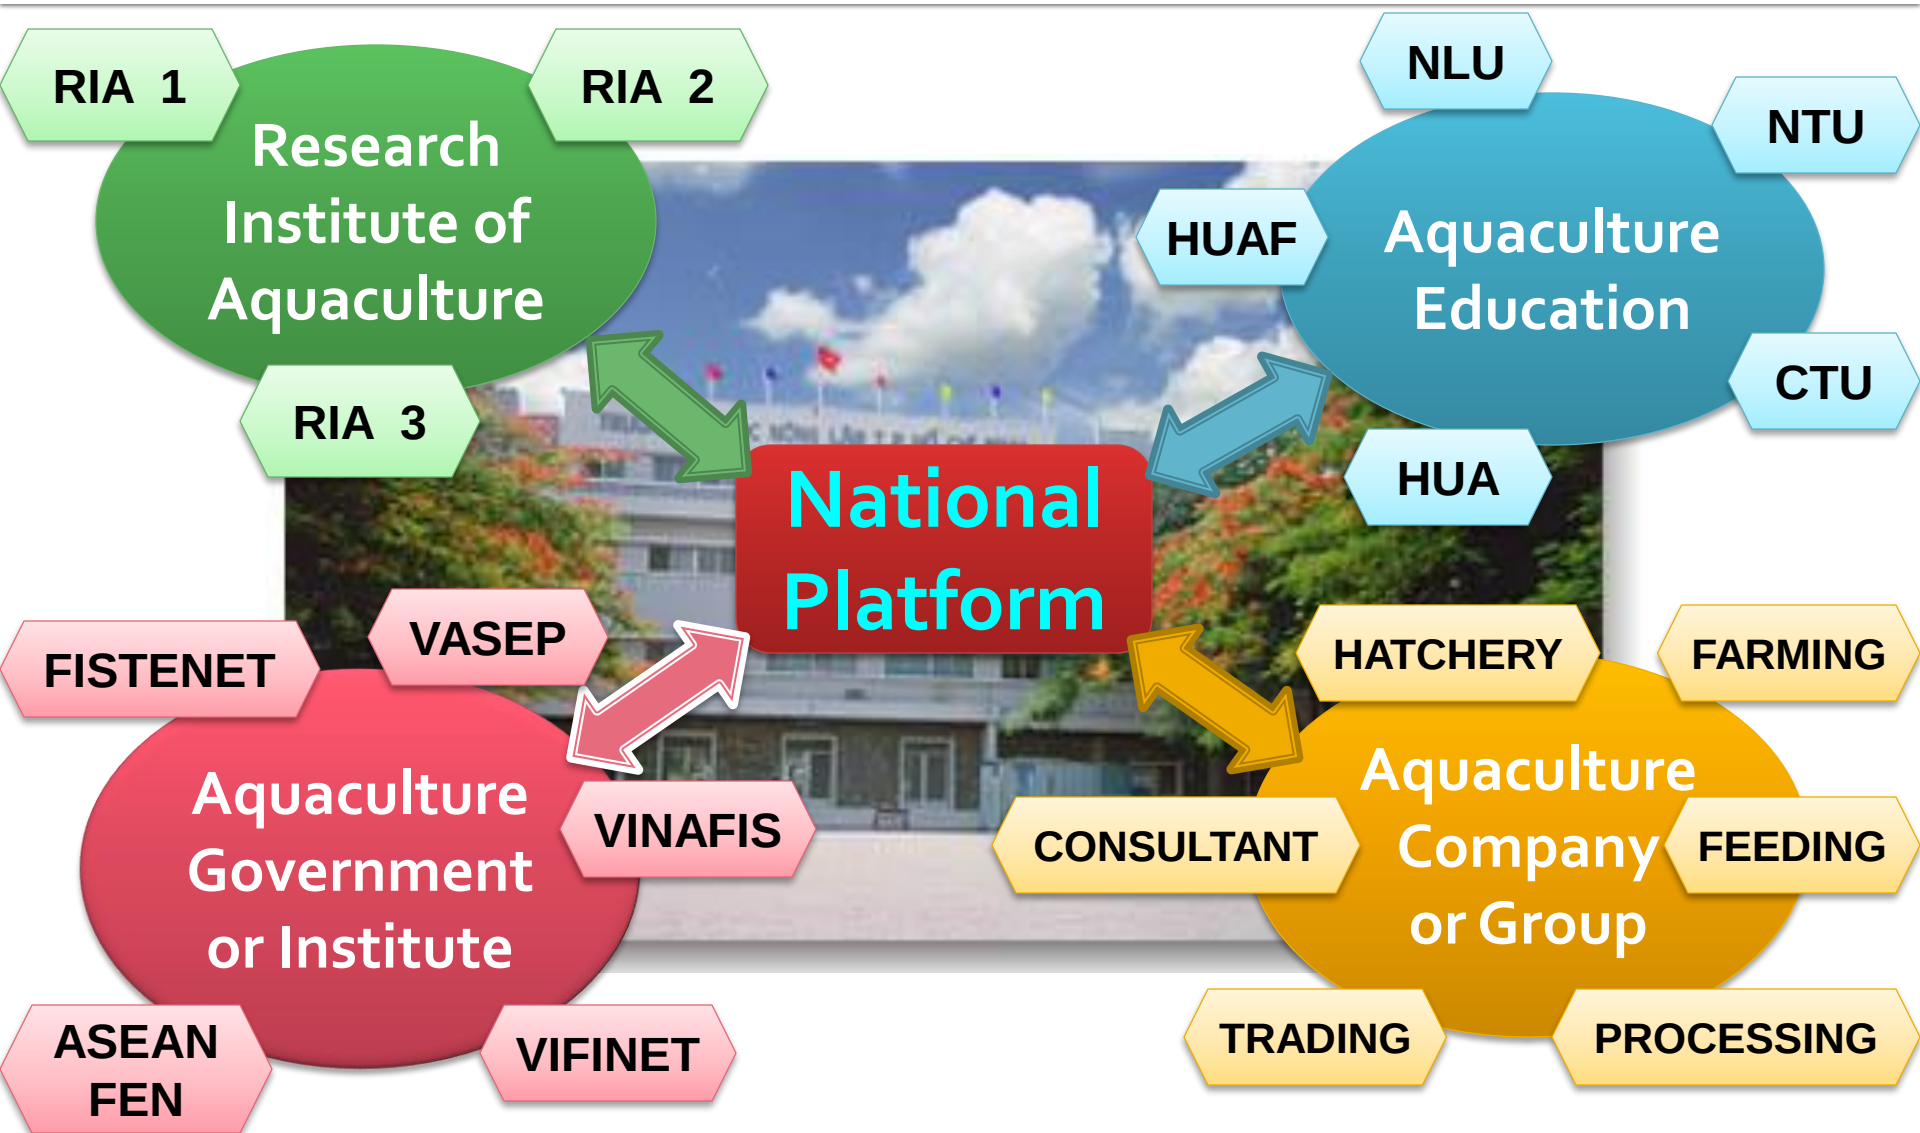

- Climate changes
- Environment degradation
- Disease outbreaks
- High production cost
- Market requirement and changing
- Not exist any National Platforms in Aquaculture
- Missing a linkage of aquaculture sectors

Solutions (orientation to 2020)

- To improve planning
- Set up a National Platform for Aquaculture
- Restructure and improve linkages
- Public - Private Partner, more private sector participatory
- Hi-technologies application
- Markets assess and products strategy improvement
- International collaboration for sustainable
- Human resources development

Vietnam National Platform in Aquaculture

Create a small core group of stakeholders

1. Go Dang Company (Godaco)

- Hachery
- Farming
- Processing

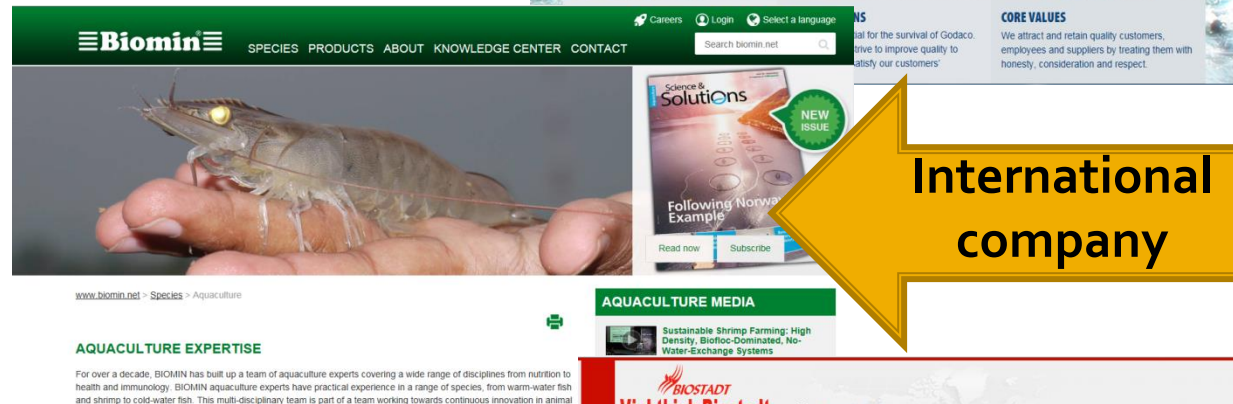

Local company

2. Biomin company

- Research
- Produce
- Service on materials

International company

3. Vinhthinh Biostadt Company

- Research
- Produce
- service on aquatic animal health

Collaboration company

The end

Thank you
